The Advantage of Insight

Compliance

Advanced technology comes with stringent regulations. Noncompliance can mean large fines and legal entanglements that damage reputations as well as your bottom line. Ensure you work with a partner who understands compliance inside and out.

- FISMA | NIST
- FedRAMP
- GLBA
- HIPAA | HITECH
- NERC CIP
- PCI DSS

Risk Management

Our experts will deliver comprehensive risk intelligence and insights that help your team prioritize risk mitigation aligned to your organization's needs. We collaborate with your internal experts and transfer the knowledge and skills necessary to keep your organizational structure secure.

- Identification
- Prioritization
- Mitigation Strategy
- Documentation
- Reporting

Cybersecurity

Your IT infrastructure constantly evolves — as do external threats, such as ransomware and denial of service attacks. Cybersecurity assessments protect your systems and data from security breaches by providing clarity around how your organization is vulnerable to attack and helping to develop mitigation strategies.

- Network Security
- System Security
- Operating System Security
- Cloud Security
- Assessment & Authorization

- Insurance
- Manufacturing
- Technology
- Transportation

Industry Experience & Qualifications

Experience

All government agencies rely on applications and tools to further their security goals and protect sensitive data and systems. Specific technologies and application systems may vary, but many commonalities exist at the network, platform, and database layers. Our assessment approach makes risk identification across the public sector consistent, reliable, and streamlined — whether we're working with a municipal government, Federal Agency, or the Department of Defense (DoD).

Since 2002, Securance has identified risks, vulnerabilities, and compliance gaps for government entities across the United States. Our risk assessment process is designed to capture risks and help your organization's risk management strategy evolve to deal with threats far into the future.

Qualifications & Certifications

Our risk management and security professionals bring years of experience to every engagement, and certifications, such as CISSP, CISA, CEH, CISM, SSCP, GCED, GCIH, GSEC, and GICSP, that meet DoDD 8140 | 8570 requirements.
